

Dr. B.R. Ambedkar's Democratic Vision: Navigating the Path to Social Equality and Inclusion in Contemporary India

Prof. Zafar Ahmad Khan*

ABSTRACT

The man who drafted the Indian Constitution, Dr. B.R. Ambedkar, was more than simply a politician and an academic; he was a visionary whose thoughts still influence India's future. His unwavering fight against social injustice and pursuit of social justice established the groundwork for contemporary India's democratic values. Fundamental to Ambedkar's democratic vision were the ideas of social equality, inclusivity, and empowerment. His lessons and philosophy are more applicable now than in the past in modern-day India, where casteism, inequality, and marginalization are major issues. This essay examines the democratic vision of Dr. Ambedkar and how important it is for paving the way for social inclusion and equality in modern-day India.

AMBEDKAR'S DEMOCRATIC VISION IN CONTEXT

The socio-political climate of Dr. Ambedkar's era must be studied in order to comprehend his democratic vision. In British India, Ambedkar was born into a Dalit household and w

as subjected to caste-based prejudice from a young age. His experiences strengthened his resolve to combat social injustices and stand out for the rights of underrepresented groups. Ambedkar's remarkable transformation from an oppressed person to the principal designer of the Indian Constitution is evidence of his tenacity and dedication to social change.

Ambedkar envisioned a democratic society in which all people would have equal rights and opportunities, irrespective of their gender, caste, or creed. His goal was to solve the ingrained socioeconomic injustices that had afflicted Indian society for generations, going beyond simple political democracy. Ambedkar thought that a society where social hierarchies were destroyed and every person was treated with respect and dignity was the only way that democracy could survive.
